- **Portfolio:** norat18.github.io

EDUCATION

Bachelor of Science
Entrepreneurship & Design Engineering
Stanford University
2013 - 2019
Stanford, CA

Awards

- 2017 Stanford Alumni Association Award of Excellence (top 10% of students)
- 2012 United States Tennis Association Pacific Northwest Scott Eden Sportsmanship Award
- Nominated for 2012 International Tennis Hall of Fame Bill Talbert Junior Sportsmanship Award

SKILLS

Leadership

- Product Management
- Program Management
- Strategic Planning
- Cross-Functional Leadership
- Stakeholder & Partner Management
- Executive Communication

AI & Building

- Claude Code (hooks, MCP integrations)
- Claude (research, writing, analysis)
- Firebase (Auth, Firestore, Hosting)
- GitHub, Cloudflare
- PRD-driven prototyping

Product Tools

- Jira, Productboard, Figma
- Amplitude, Segment, Looker

SUMMARY

Product and operations leader with 5+ years building software that runs physical systems (body cameras, drones, sensors) across public safety, healthcare, and industrial automation. Delivers high-stakes programs to hard deadlines with external partners, including Color's COVID telehealth program. Now focused on climate and energy, and fluent in AI tools: I design and ship my own products end to end.

WORK EXPERIENCE

Climatebase Fellow

Climatebase

March 2025 - current Seattle

- Chosen as a Cohort 7 Fellow in the Climatebase accelerator, empowering professionals to drive climate innovation.
- 4th State Chemicals (CO_2 Utilization): Assessed high-value applications for captured CO_2 beyond geological storage, identifying circular industrial by-product markets to scale emissions reduction through carbon transformation.
- Solacia (Marine CDR): Led commercialization strategy for ocean-based carbon removal startup. Researched calcium bicarbonate applications in cement, identified policy-aligned use cases for CO_2 utilization, and contributed to carbon credit market entry strategy, positioning the solution for durable storage and decarbonization at scale.

Product Manager II

Color

2021 - 2023

- Built, launched and scaled Color's Telehealth Platform, generating $XXM ARR to provide care for Infectious Diseases.
- Led COVID-19 Antivirals treatment programs, enabling xx,xxx on-demand visit requests, with a median visit wait time of 2 minutes.
- Managed three external partners through shifting timelines and API changes to deliver the COVID-19 telehealth program, following up and advocating for the integration changes the launch depended on.
- Enhanced COVID-19 testing platform usability, generating $XXM ARR through UI/UX enhancements, translation services, consent processes, and distribution of bulk home test kits.
- Improved digital accessibility by implementing WCAG 2.1-compliant solutions and launching a phone hotline for equitable care access.

Product Manager II

Axon

2019 - 2021

- Built, launched and scaled Axon's real-time situational awareness platform (live-streaming and mapping) to xxx global public safety agencies and xxxx thousands of users. Improved livestream success rate by 35%, livestream usage by 1,100%, live map views by 800%, and real-time evidence offload usage by 400%.
- Owned weekly executive communication to the Chief Product Officer on the situational awareness platform after launch, reporting progress, risks, and next priorities.
- Built a physical evidence and property management system, and business strategy that increased SAM by 50%.

Product Manager, Strategic Initiatives

Skycatch

2017 - 2018

- Led development of $300K R&D project for enterprise drone automation product line, resulting in 50% reduction in mining process times.
- Developed software systems interfacing with physical hardware (body cameras, drones, sensors) to enable real-time data ingestion, processing, and visualization.

INDEPENDENT PROJECTS

- **PNW Ski Tours** (pnwskitours.com): Designed and shipped a backcountry ski tour planner for the Pacific Northwest using AI-assisted development; own the product end to end, from spec to domain and hosting.
- **Short List** (short-list-meals.web.app): Built and launched a macro-optimized meal planning web app with Claude Code, from PRD to private per-user recipe libraries (Firebase Auth, Firestore security rules), hosting, and an automated GitHub workflow.
